**SMART SYSTEMS THAT DO MORE – COST LESS
GELLER ELECTRONIC CASH REGISTER TERMINALS**

At the hospitality and retailing point of sale since 1957

Amazing value, good looking and reliable, AX-200 provides cost effective control for today's busy trading environments.

While its low price makes AX-200 an attractive choice for the smaller business, its high specification and superb performance make it equally popular in larger organisations and busy locations.

Displays

The 4-line 24 character alphanumeric operator display describes all items by name and gives user-friendly prompts to ease and speed service. The single-line LED turret display can be rotated to the best viewing position for the customer.

Drop and Load Silent Printer

AX-200's hi-tech drop and load printer, with separate 58 mm thermal receipt and audit rolls, simplifies and speeds paper roll changes and eliminates the possibility of paper jams. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time. There is a 5-line header message for your company details and VAT number and a 5-line footer for your sales or thank you message.

Option of Low Cost Scanning

The AX-200's memory can hold up to 5,000 sales items as Price Look Ups. You can enter sales manually on the keyboard by registering the Price Look Up number. Or you can scan bar-coded items for high-speed sales. A range of low-cost scanners is available for the AX-200.

Bar Code Learning

If you come across an unprogrammed item - even in the middle of a sale - 'Enter Price + Linked Dept' appears on the screen. After you enter the price and press the department, subsequent sales of the item will scan, showing the price and department name. Barcode names and prices can also be entered by PC.

Server Interrupt

5 servers can use the AX-200 concurrently to avoid queue build-up. If a server leaves an unfinished order on display, it is automatically stored if another server uses the machine and brought back when the original server enters his ID number. Alternatively unfinished orders can be automatically stored after a pre-programmed number of seconds.

Authorised Sales and Service Dealer

Some of the many important features:

- 40 Servers by programmable ID number
- Compulsory Server ID
- 5,000 Price Look Ups
- 15 Departments as standard. More departments available as programmable option.
- Stand-alone scanning for up to 5,000 items with simple price and product maintenance and barcode learning feature
- Price Check Feature - press 00 and scan the barcode. The price displays on the screen
- Training Mode for new staff
- One RS-232 communication port for programming the AX-200 by PC and/or linking to a barcode scanner
- Paper saving mode (half-height font)
- Password protection for X and Z reports
- Cash Lift Alarm warns when money in drawer reaches a pre-programmed amount
- Heavy-duty cash drawer with unbreakable metal note clips

Solid State Memory for Data Security

From the many useful features available on the AX-200, you or your dealer can select just the programmable options that suit your business. Your programme and sales data are securely stored in battery-backed RAM memory.

Powerful Management Reporting

A choice of thirteen management reports is available daily and periodically to provide the information you need to control your business. Five Display Only reports (flash reporting) are also available.
