BJ-18 Coin Counter

• Clear LED read out display gives you an accurate count!

• The BJ-18 is ideally suited in areas of volume 'coin cash'!

• The BJ-18 has a Hopper Capacity of 300-500 Coins!

• The BJ-18 is a great Back Office addition for 'cashing up'!

• Once completed, your mixed coins are sorted for bagging up!

Every mistake you make counting money will cost you money! Luckily you can trust the infallible help of Baijia Coin Counters.

They'll prevent expensive failures and will save you time and money. And because they are attractively priced you will get your investment back quickly.

All Baijia machines are tested very thoroughly. That's why they are used by numerous large, medium and small retail and service companies in the UK.

Quickly counting and sorting does not pose any problems for this model either. It processes approximately 220 coins per

minute. You can feed 300 to 500 coins at a time into the device and can continue adding coins while it is counting.

When counting is completed, your mixed coins are sorted into the individual hoppers for bagging up.

You can also have this model bundle a preset amount of coins.
