- Clear LED read out display gives you an accurate count!

**Can you count up to 16 notes per second?
A money counting machine from Baijia counts effortlessly up to 1,000 notes per minute.**

Unfortunately it is becoming more and more difficult to recognize 'fake' money these days. Counterfeit money is becoming more of a problem every day.

The Baijia BJ-80 checks for counterfeit notes whilst doing its note count and will alert you to errors.

Simply stack your same value notes onto the hopper plate at the rear of the machine and counting starts automatically!

The 'size-detection' function verifies that all the notes in a

stack of money have the same value. Memory, sum and bundling features and a large LCD display come standard.

All Baijia machines are tested very thoroughly. That's why they are used by numerous large, medium and small retail and service companies in the UK.
