

Innovation through experience

RP-2500 FirstPlus Hospitality System

Powerful performance meets simplicity and elegance in a neat combination of technology and style.

Robust, reliable and remarkable value, RP-2500 FirstPlus delivers all the hospitality features you need while occupying less counter space than an A4 sheet of paper.

- Includes GellerTouch FirstPlus Hospitality Software
- Easily operated even by part time staff
- Management reporting to suit the need

Small size – great performance

Quality construction

Exceptional value

Good looking terminals that mean business

Attractive from every angle, the die-cast aluminium housing is enclosed in moulded Plexiglas for a prestige look that enhances the décor of any environment. Cables are recessed within the base, avoiding unsightly wires on view and accidental cable disconnection.

Built better to serve you longer

RP-2500's metal construction and external power supply ensure cool running, longer component life and protection from external electronic 'noise'. RP-2500 does not need a cooling fan, so operates silently.

Built in flexibility to suit your needs

RP-2500 can be a complete stand-alone hospitality system. For locations with multi service points, as many RP-2500s as are needed can be networked in the same system and can share kitchen, bar and receipt printers. Reporting can be per terminal or consolidated onto one terminal.

Small footprint – big value

Occupying less counter space than an A4 sheet of paper, RP-2500 comes as standard with magnetic lock and server keys for security. Each key can be individually programmed to allow just order entry or registration of sales. Alternatively, keys can be programmed to allow additional functions for management.

Excellent connectivity

RP-2500 is generously equipped, front and rear, with ports for peripherals such as kitchen, bar and receipt printers, scanners and keyboards.

Authorised Sales and Service Dealer

Simple to use - plug in and go

GellerTouch FirstPlus Hospitality Software, suitable for bars, pubs, restaurants, cafés, fast food and leisure clubs, is built in as standard. Fast and easy to use, even part-time servers can operate the system with just a few minutes' training.

A few of the features:

- Floating Server and Guest Check
- Several servers can operate the system concurrently to avoid queue build-up
- Speedy passing of cooking instructions/customer preferences to kitchen and bar
- Split or combined customer bills
- Half pints and doubles
- Management reporting customised to individual business requirements
