Samstock 4.8 - An Overview

Samstock is a Stock Control and Management Information System suitable for retail and hospitality businesses. Choose single store or multiple branch licenses providing comprehensive reporting for both one location or consolidated branches.

Samstock tracks sales quantities and values for each product sold providing detailed, comprehensive reports on sales and profit. Historical sales reports are available by date range and comparative periods.

Samstock provides stock control with recommended re-orders, delivery tracking and stock taking with variance reporting. Samstock can also control maintenance of product files including prices and promotions.

- Samstock automatically collects detailed sales information from the Point of Sale either directly to your back office PC via Ethernet, PSTN or ADSL Broadband.
- Samstock communicates with various cash registers, Sentinel and I.C.R. Touch Screen Software.

"The Sam4s SPS-2000 features advanced touch screen technology. Pre-loaded with stable, proven and flexible software for both hospitality and retail solutions".

SPS-2000 Reports to PC or Mobile Phone

The SPS-2000 benefits from Ethernet and Broadband communications.

This concept has been enhanced to include the sending of Reports direct to a File Transfer Protocol Web site.

Reports can then be viewed directly on the FTP Website using a standard Web Browser or sent to an email address or to a mobile phone as a text message.

■ Reports can then be viewed directly on the FTP Website using a standard Web Browser or sent to an email address or to a mobile phone as a text message.

SPS-2000 & Orderman Handheld

All kinds of catering outlets of all sizes can benefit from using Orderman, time saving and greater control over order processing are important factors for any establishment.

Orderman enables staff to accurately take orders at the table. Orderman transfers the order to the SPS-2000 system and prints

the order directly to the kitchen.

SPS-2000 Main Features

Memory

The latest, high performance, solid state onboard flash memory negates the need for unreliable hard drives and unnecessary operating systems.

12.1" XGA Touch Monitor

The SPS-2000 provides vivid colour with high resolution TFT LCD touch screen which is protected from harsh operating environments. The viewing angle is adjustable between 22° and 77°.

Network and Peripherals

Fast ethernet network capability allows sharing of transaction data. Wireless Network Capability versatile connectivity for peripherals via 6 serial, 2 USB, cash drawer, mouse and keyboard ports.

Operator Security

Fast, secure and reliable operator sign on by Dallas key.

Reports can be any of the X, Z or String Reports, IRC or Standalone. The uploaded reports can be sent directly to email accounts using a scheduler. Key transaction totals can be sent as a Text Message to mobile phone numbers.

System Management No Worries For You

Management facilities of the reporting system are provided, including automation of the transmission of the reports to an Email Address or via a Text Message to a mobile phone.

No extra software required, no maintenance for you. All you have to do is install the SPS-2000 system and our Planet ADW-4302 ADSL Router to a Broadband line.

Report Key

■ A Report Function Key allowing reports in Register Mode controlled using a security code. This function can be added to any screen as a manual entry or within a macro for specific report settings.

Auto Stock Count Down

■ Shows the current stock count of an item on the button the stock count reduces as the item is sold.

Orderman

■ Fast keys now have a Split Bill option. Items can also be moved to another table for payment- In addition the Receipt and Bill prints can be re-directed to an alternative printer. System flag control is possible for secure restriction of voids etc.

Meal Order Print

■ Items can be printed in the kitchen in Group order; Starters, Mains, Desserts etc.
