NETWORKABLE EFFICIENCY, EXPANDABLE CAPACITY

FEATURES

- Stylish Design
- Large, Multi-line Display
- Quick and Quiet Thermal Printing
- Easy Barcode Scanning
- In-line Communication
- Customisable Flat Keyboard (UP-700)
- Training Mode
- Large LED Customer Display
- Two RS-232 Interface Ports (Max. 4 Ports)
- High-capacity lockable cash drawer
- Drawer Alarm Timer
- Auto Key Function (Max. 10)
- Price Shift Function
- PLU Menu Change Function (UP-700)
- Recall GLU Function
- Menu/Condiment/Combo PLUs
- Bottle Return Plus/Minus Group
- Flash reporting
- Full Report Capability

SPECIFICATIONS

Display	Operator	Monochrome LCD backlight 8 lines x 20 characters
	Customer	Large LED, 7 digits 7 segments
Printer	Type	2-Station thermal
	Digits	30 Digits
	Speed	Approx. 17 lines/sec
	Paper Width	Approx. 58mm
Drawer	Bill	4 Compartments
	Coin	8 Compartments
Keyboard UP-600	Type	Normal
	No. of Keys	Standard 68 keys, max. 84 keys
UP-700	Type	Flat
	No. of Keys	Standard 144 keys
Communication	RS232 I/F	Standard 2 ports, max 4 ports
	IRC (Ethernet)	1 Port (option)
EAN/PLU	Number	Standard 1000, max. 30,000
Tax Function		Total 6 rates (VAT or add-on-tax)
Dimensions (W x D x H)		420 x 448 x 306mm including drawer
Weight		14.9kg including drawer
Power Supply		Official (Nominal) voltage and frequency

Two point of sale terminals designed for retail (UP600) and hospitality (UP700) with a uniquely efficient way of communicating. Using the internet the terminals can be programmed to e-mail all sales data in one single transaction, in exactly the same format as it is on the terminal, improving business efficiency and reducing operational costs. Both models offer more sophisticated operation than is usually found in terminals of this class, making them ideal for expanding businesses. This comes from the ability to create a network, in one building, of up to 16 mixed UP600 and UP700 terminals. As part of a network, changes can be made on the master or slave terminals and downloaded to the rest of the network, reducing the time spent on a previously time consuming job.

Every possible detail has been catered for from silent thermal printing that does not disturb customers and reduces transaction time to the ability to set different prices on different terminals on a network to the tiltable back lit LCD screen, which utilises Sharp's leading edge LCD technology, enabling the operator to see up to eight lines of information even in low light environments. These models also have easy scanning, should items make it to the check out without having been entered into the master product file, they can be scanned during the sales transaction and added to the master file.
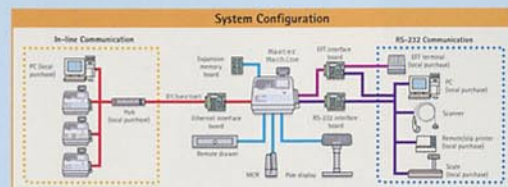

The UP600 and UP700 are ideal for businesses planning to expand – affordable as standalone terminals when a business needs just one or two machines, but with their network capability and unique method of communicating via the internet they are the perfect machines for every stage of your business's growth.
