

XE-A303

Three great reasons to invest in the Sharp XE-A303 electronic cash register.

Quick and quiet, twin-station thermal printing

The Sharp XE-A303 silently prints out sales receipts at an impressive speed courtesy of its thermal printing technology. The XE-A303 also prints graphics – for example, your business logo – to enhance the way you present your business to your customers. Transactions are recorded onto two separate rolls – receipt and audit – for easy sales management.

Clear display for user-friendly operation

A brightly lit two-line LCD operator display ensures the Sharp XE-A303 is easy to use, even in low-light environments. The easy-to-read screen displays up to 16 alphanumeric characters, allowing you and your staff to view the names of purchased items and other information at a glance. Further clarity is offered by the 2 colour backlight which changes the display to red for void sales.

High-capacity metal cash drawer

This perfectly designed, space-conscious cash drawer takes up minimum counter space while still providing ample room for 5 note and 8 coin compartments. When not in use, the rugged drawer is locked shut for maximum safety and protection of your money.
