# JIVA XT-3215 Series

Flexible! Powerful! Elegant!

In today's retail and hospitality market, POS terminal is no longer just a cold and hard business tool. It is a part of the store decoration, a part of the store image. Each curve and detail of the POS terminal should add something to the overall mood of the store, to lift the shopping experience of the customers.

With beautifully sculptured slim body, sexily curved base stand, JIVA XT-3215 Series looks right at home at any elegantly decorated store. And more than just good looks, JIVA XT Series also offers ample of performance and flexibility to satisfy the most demanding of daily POS operations

### Flexibility

JIVA XT-3215 series comes with the selection of two newly designed foldable bases, the curvy slim 7th Generation Base and the larger but practical 8th Generation Base. The new foldable base allows JIVA XT-3215 Series to be configured into different configurations. "Flat Folded Mode" to save the shipping package volume. "Low Profile Mode" to allow greater interaction between cashier and the customers; and the traditional "Full Extended Mode". All this can be achieved with a simple pull of the hidden lever. This one terminal/multi-configurations concept provides unmatched flexibility to store owners and system integrators alike.

### Looks

JIVA XT-3215 Series comes from new Posiflex design language. Slimmer and sexier than ever, it is a sharp departure from the traditionally more conservative Posiflex terminal design. Every curves and details are carefully thought out to make JIVA XT-3215 Series one of the most visually desirable terminals in the market.

With 2nd display LCD

### Dual LAN

JIVA XT-3215 Series provides dual LAN ports that allow a dedicated LAN connection for credit card terminal.

### 8th Generation Base

Optional 8th Generation Base that integrates internal power adaptor and Powered USB port into the base stand, which allows for clutter free counter.
